1. Claims 1, 2, 4 and 7-8 are allowed.

After careful consideration of the applicant's request for reconsideration of the concerning the rejection of the last Office action of 11/15/2007 is persuasive and, therefore, the provisional double patenting rejection has been withdrawn. Amended claim 1 teaches a silicon feedstock containing between 0.3 and 5.0 ppma boron, between 0.1 and 10 ppma phosphorus, less than 150 ppma of metallic elements and less than 100 ppma carbon distributed in the material, which is distinguished from the silicon feedstock in co-pending application 11/772,813

2. The following is an examiner's statement of reasons for allowance: The most relevant prior art reference of Dosaj. However, Dosaj does not teach a silicon feedstock containing between 0.3 and 5.0 ppma boron, which is substantially lower than the boron

content taught by Dosaj. A 0.1 to 10 ppma phosphorus content is taught by Dosaj, which is higher than the phosphorus content of the instant invention. Dosaj's silicon is produced using carbonaceous reduction agents that with no means for removing carbon from the silicon, thus having a much higher carbon content, as taught by the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
